## Christ Community Church

Christ Community Church provides a reflective and powerful worship experience in a relaxed atmosphere through guitar and vocals. This worship allows the members of Christ Community Church to share Christ's compassion with others.

Christ Community Church takes seriously God's command to share His life-impacting message of love with the city, the nation, and the world.

A partnership with The Hospital for Women and Children in Mali, a partnership with North Omaha ministries, and an orphanage in Beijing are ongoing initiatives with impact unique to this hour in history. The vision is for the transformation of Omaha, China, and Mali one life at a time through risk-taking, groundbreaking approaches, and generosity. Electronic Contracting has installed systems for Christ Community Church's Access Room, Student Center, and Worship Center.

## Systems Installed

- Audio/Visual
  - Crestron Control Systems

"Having guys that are very quick to answer questions, very quick to respond if something needs to get done, helps us be sure that we're running every single Sunday."

— Travis Williams, Director of Technical Arts
