Community Hospital-Fairfax

The new home of Community Hospital-Fairfax opened on September 13, 2010. It's a facility focused on inpatient, outpatient, and emergency care. There are 16 private inpatient rooms to care for acute care and skilled care patients, as well as obstetrics patients.

The hospital is a non-profit facility designated as a Critical Access Hospital. They provide 24-hour emergency services, diagnostic laboratory services, radiology services, and physical, occupational or speech therapies. Dr. Erica Gillette practices family medicine in the CH-F Primary Care Clinic.

Community Hospital's services truly support life in much of the surrounding region. It's there where babies are born, broken bones mended, family and friends seek medical care, and workers and retirees alike receive access to both routine exams and specialists.
