Design Data

Design Data has set the standard with its SDS/2 software since 1981. As a leader in steel industry software development for 30 years, they constantly bring new technology to the market. Not only was it the first steel software of its kind, Design Data's SDS/2 remains the standard by which all other systems are judged.

Their history of leadership and innovative features is unsurpassed by any competitor, providing a clear-cut advantage for SDS/2 users. They share a leadership position with the American Institute of Steel Construction (AISC), working on the development of integration of models and model data with CIS/2.

For three decades, Design Data has diligently worked to make SDS/2 the best product on the market. By constantly updating SDS/2 with an array of new and creative solutions, Design Data remains at the forefront of innovation in the steel industry.
