Nebraska Wesleyan University: Duane W. Acklie Hall of Science

The Duane W. Acklie Hall of Science is Nebraska Wesleyan University's first new academic building in 36 years. The three-story facility sits around 80,000-square-foot and includes classrooms, laboratories, student study spaces, faculty offices, and a greenhouse.

The \$29M building of red brick and green glass honors the late Duane Acklie, a Lincoln business leader. The Acklie Charitable Foundation was the leading contributor to the three-level facility.

The new building contains 15 labs, six classrooms, 10 student study areas, and 30 faculty offices. It has features such as interior windows so visitors can look in at the lab work being done (called "science on display"); shorter, wheelchair-accessible lab benches; large flat screens for slides and videos; and an outdoor balcony at the coffee shop.

Electronic Contracting Company partnered with the university to provide facility-wide Audio/Visual Systems and a Fire Alarm System.

Systems Installed

- Audio/Visual
 - Crestron Tabletop Video Conference System
 - With Built-In Wireless Presentation
 - 4K Digital AV Distribution & Management
 - 4K Digital AV Distribution & Management
 - Room Monitoring and Recording System
 - Digital Signal Processors
 - Wired Microphones
 - HD Video Displays
 - HD PTZ Cameras
 - Power Amplifiers
 - Crestron Control Systems
 - Featuring Touch Screens
 - In-Ceiling Loudspeakers
 - HD Video Projection
 - HD Video Monitors
 - HD Video Displays
 - Mixer/Amplifiers
 - Digital Signage
- Fire Alarm
