Old Cheney Rehabilitation

Old Cheney Rehabilitation provides post-acute care in a distinct environment. They care for adults of all ages who are recovering from surgery, illness or injury, which include: orthopedic surgery, stroke, cardiac or open heart surgeries, heart disease, amputations, diabetes, patient's requiring IV or wound care, dialysis patients, post-operative observations, plastic surgery recovery, and recovery from an acute or extended illness.

Electronic Contracting Company worked with Old Cheney Rehabilitation to provide a Fire Alarm System, Ascom Telligence Nurse Call System, IP Access Control System, P Video Management System, Door Video Intercom, and a Public Address/Background Music System.

With the Nurse Call System, ECCO's solution allows for control of the headwall lights and the TVs in the patient rooms. ECCO also provided its own Monitor32 Event Management System with Pocket Paging as part of the nurse call.
