## TD Ameritrade Park

TD Ameritrade Park is home of the Creighton Bluejays and the NCAA College World Series. This 24,300 seat stadium is among the finest ballparks in the country and will serve its patrons for baseball, football, outdoor concerts, and private events for years to come.

It is among baseball's most technologically advanced, with modern features including microphones embedded in home plate and the pitcher's mound, the second largest video board in the state of Nebraska, and a sub-air system within the playing surface that can either heat or cool the field.

The venue is also outfitted with high-tech sound reinforcement and broadcast cabling systems designed by Austin, TX-based BAI and installed by us at Electronic Contracting Company. The sound system features over 700,000 feet of cabling and 120,000 watts of power. Additional cabling provides more microphones to make the crowd sounds denser and also allows individual sounds, like vendors, to be pulled into focus without taking away from the main-play audio.

## Systems Installed

- Sound Reinforcement
  - *Announcer & Wireless Microphone System*
  - *Digital Effects Playback System*
  - *Assistive Listening System*
  - *Digital Signal Processors*
  - *Crestron Control System*
  - *Induction Loop System*
  - *1,000 Loudspeakers*
  - *Broadcast Cabling*
  - *Power Amplifiers*
