Tractor Supply Co. Distribution Center

Tractor Supply Company's 425,000 sq. ft. regional warehouse manages 10,500 SKU's for 114 TSC stores in 13 states. Completed in December of 2005, the warehouse includes 51 truck docks and a modern gravity-fed conveyor system.

Tractor Supply Company operates nearly 500 stores in 31 states. Located in mostly rural communities and outlying areas of large cities, its stores sell about 13,000 products used to maintain farms and ranches. About the only thing the stores don't sell, the company says on its website, is tractors.

Operating 24-hours-a-day, their distribution centers feature some of the most technically advanced operations in the industry with hands-free pick-to-voice, warehouse automation, advanced material handling equipment, high-speed sortation, and more. Their newest facilities even span the size of 10 to 18 football fields.

Systems Installed

- Public Address/Overhead Paging
- Video Surveillance
- Intrusion Alarm
- Fire Alarm
