CORRECTIONAL CONTROL

SIMPLIFY YOUR SECURITY

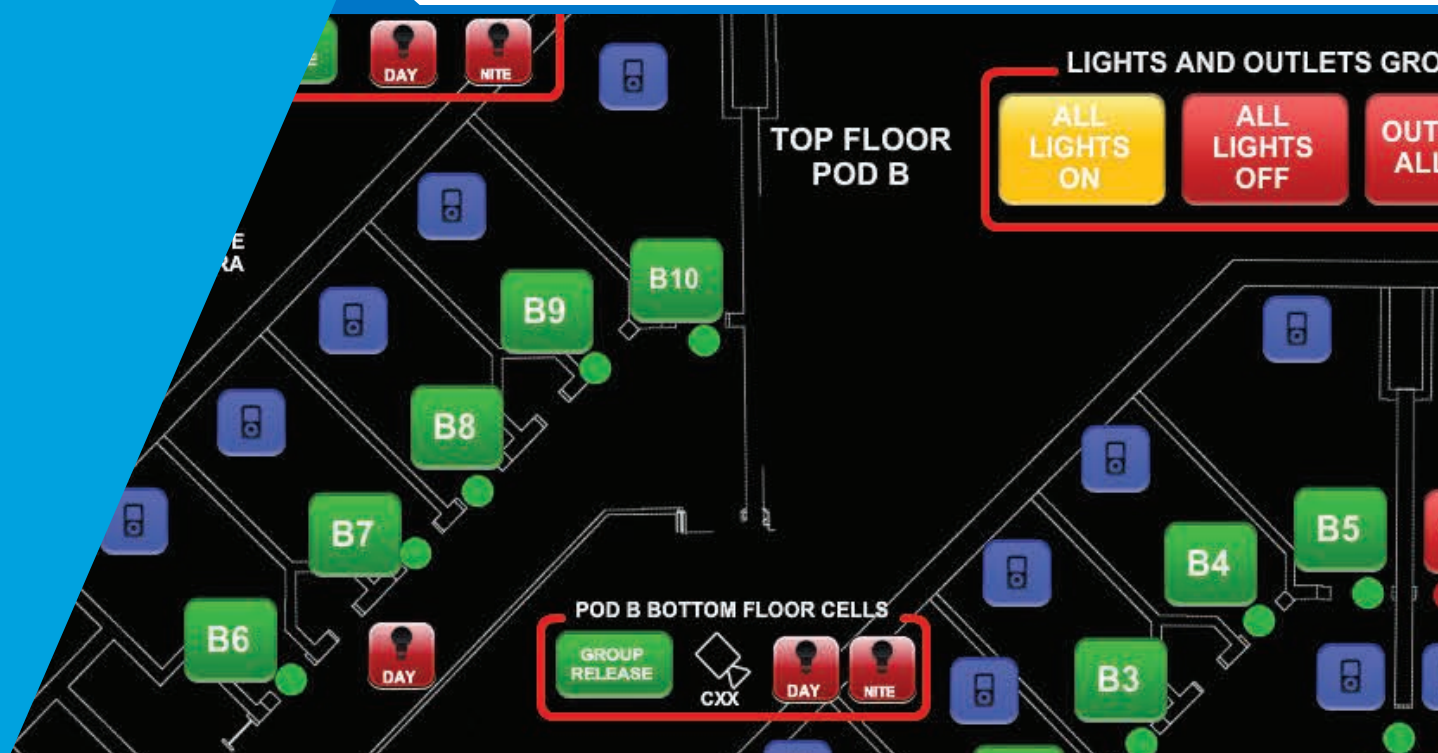

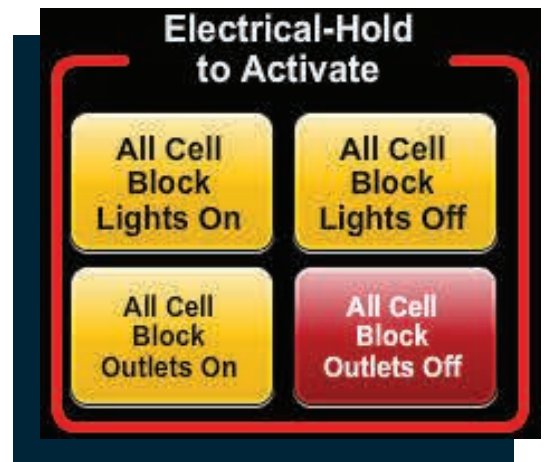

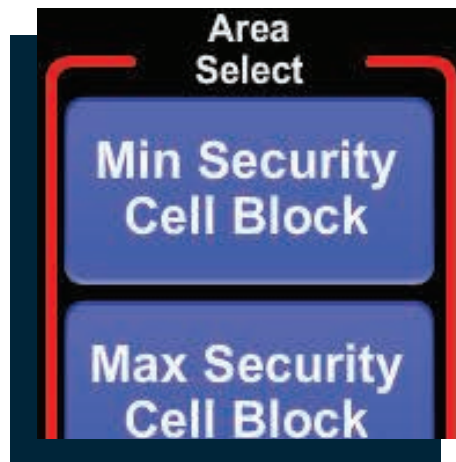

INTELLIGENT TOUCH SCREEN CONTROL

ECC's IMPERIUM™ gives you intelligent correctional control, right at your fingertips. It's custom designed to your facility's exact needs and integrates directly into your workflow. You can control your entire correctional facility right from a touch screen. It shows your entire floor plan, with the ability to easily change between floors. Function buttons and status indicators are populated on your floor plans that give the control and monitoring abilities that you need. Integrate with your security cameras and intercom system to display the associated camera when an intercom button is pressed on the touch screen. Inmates' names can be displayed on the graphic display next to the cell they occupy. Additional information such as work locations and restrictions can also be displayed, simply by touching a button. Switch between compact and detailed graphic screens. Have a one-button emergency gang release and lockdown button. Control your correctional facility how you want.

CONTROL & AUTOMATE YOUR UTILITIES

Imperium's function buttons give you complete jail control at the touch of a finger:

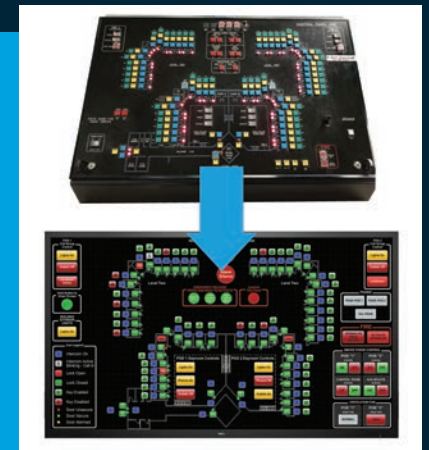

- Locking & unlocking of doors
- Lockdown ability
- Intercom control
- Paging control
- Audio monitoring
- Lighting control
- Water control
- Telephone control
- Power outlet control

JAIL SECURITY – SIMPLIFIED

The Imperium Correctional Control System makes security easy:

- Touch screens that show vital building activity
- Retrofit without costly field device changes
- Switch between compressed and detailed graphic screens
- Display color coded text for each cell
- Door status indicators show real-time door position activity
- Door lock buttons control lock and unlock functions
- One-button emergency gang release
- Automated reporting for easy performance checks
