

Autonomous Disinfection That

DELIVERS

Meet Violet™ Gen IV: *Smart, Powerful UVC Protection*

ECC, in partnership with ClearFocus Robotics, brings you Violet™ Gen IV — Your new frontline defense against harmful pathogens. Engineered for healthcare-grade environments, Violet™ provides consistent, high-efficacy disinfection using UVC light, reducing room turnover time and minimizing infection risks—all with minimal staff intervention. Benefits include:

- **Hospital-Grade Disinfection:**
Kills 99.99%+ of pathogens, including MRSA and C. diff
- **Faster Turnover:**
Reduces downtime in patient rooms, surgical suites and exam areas
- **Hands-Free Efficiency:**
Fully autonomous with smart navigation (no manual labor required)
- **Compliance & Confidence:**
Keeps infection prevention protocols on track with real-time disinfection logs

Raising the Safety Standard, Not the Workload

From ERs to ICUs, Violet™ elevates infection control while reducing labor demands. It's not just an investment in technology, it's an investment in safer, smarter care.

Put Smart Disinfection to the Test
